Ireland

Re: reference.

To whom it may concern,

I have been asked to provide a reference for Mr Danny Rutar, Managing Director of Redback Biotek. I am more than happy to oblige given the quality of service he and his company have provided.

I have come to know Danny and RedBack Biotek as a result of my recent employment with Liverpool John Moores University (LJMU) and introduction to AEI Technologies MOXUS metabolic carts. The Research Institute of Sport and Exercise Sciences (RISES) at LJMU has three MOXUS metabolic carts and associated equipment, a total investment of approximately £150,000. AEI are widely regarded as producing the most accurate and reliable, fastest responding and longest lifespan analysers in the World, for which Redback are the sole UK suppliers.

Danny has been incredibly supportive, spending many hours and drawing on what is obviously a great depth of experience and knowledge to help technical staff and myself become familiar with the MOXUS systems. Danny and RedBack are always able to address queries in a very short period of time, and they have come to be an indispensable link between our base in the UK and equipment manufacturers in the USA. I look forward to continuing to work with Danny and RedBack in the future.

Kind regards,

Andrew Moss
